

DERMATEC DIRECT

PRESENTS:

THE STRETCHY NITRILE POWDER FREE EXAM GLOVE

Twilight Blue Stretch Nitrile: the most popular selling latex-free examination glove amongst dentist, doctors, nurses, and medical professionals!

Equipped with the look and feel of a latex glove yet having the exceptional protection and allergy free qualities of a non-latex glove, the stretch nitrile is superior of its kind. Formulated with a non-visible micro-beaded texture, the stretch nitrile produces an outstanding grip in any wet and dry tactile situation.

Nitrile gloves are rated by their "recovery rate." Standard latex gloves have a recovery rate of 80%, while standard nitrile gloves hold a recovery rate of 30-40%. The Dermatec Stretchy Nitriles carry a recovery rate of over 60%!

- maximum comfort for long term use
- textured surface for enhanced grip
- superior material provides maximum protection
- look and feel of a latex glove
- powder free
- 100 gloves/box
- attractive blue-violet color
- 3.5-4 mil thickness
